December 2013 Logic Puzzle: Seisún Time

In many rural communities in Ireland, sessions are an integral part of community life where the conversation and camaraderie are an essential component. Four coworkers have found that, despite the difference in their ages, they share a love of traditional music acquired in their younger days. They have agreed to get together once a week for a traditional session to keep the tradition alive. Though all are Irish, each was born in a different city and each plays a different instrument. From the clues provided, determine which was born when, where, and what instrument each plays.
